

# SGM8708 Micro-Power, RRIO, 1.8V, Dual Push-Pull Output Comparator with Integrated Voltage Reference

## GENERAL DESCRIPTION

The SGM8708 is a dual, rail-to-rail input and output comparator with typical  $2.2\mu A$  low power supply current. The comparator operates from a wide range of 1.8V to 5.5V supply voltage, and is guaranteed to operate at 1.8V and 5V. This feature is suitable for battery-powered applications.

The product features an uncommitted internal voltage reference, comparator input common-mode around 200mV outside the power supply rails and can be operated from 1.8V to 5.5V. The internal 1.2V series reference voltage offers low  $42\mu V/{\circ}C$  drift, is stable at 10nF capacitive load, and can produce output current up to 2mA (TYP).

The SGM8708 is optimized for micro-power, single-supply operation. The push-pull output stage supports rail-to-rail output swing and allows the operation with absolute minimum power consumption when driving any capacitive or resistive load. The SGM8708 also has a latch enable input pin ( $\overline{LE}$ ) and complementary outputs.

The SGM8708 is available in Green SOT-23-8 and SOIC-8 packages. It is rated over the -40°C to +85°C temperature range.

## FEATURES

- **Low Quiescent Current:**  
 $2.2\mu A$  (TYP) at  $V_s = 1.8V$
- $V_{OUT}$  and  $\overline{V}_{OUT}$  Dual Outputs
- **Wide Single-Supply Voltage Range: 1.8V to 5.5V**
- **Latch Function Included**
- **Rail-to-Rail Input and Output**
- **Push-Pull Output Current Drive:**  
 $18mA$  (TYP) at  $V_s = 5V$
- **Internal 1.2V Reference Voltage**
- **-40°C to +85°C Operating Temperature Range**
- **Available in Green SOT-23-8 and SOIC-8 Packages**

## APPLICATIONS

- Portable and Battery-Powered Applications
- Alarm and Surveillance Circuits
- Mobile Phones
- RC Timers
- Hand-Held Electronics
- Window Detectors
- IR Receiver

## PACKAGE/ORDERING INFORMATION

MODEL	PACKAGE DESCRIPTION	SPECIFIED TEMPERATURE RANGE	ORDERING NUMBER	PACKAGE MARKING	PACKING OPTION
SGM8708	SOT-23-8	-40°C to +85°C	SGM8708YN8G/TR	SH7XX	Tape and Reel, 3000
	SOIC-8	-40°C to +85°C	SGM8708YS8G/TR	SGM 8708YS8 XXXXX	Tape and Reel, 2500

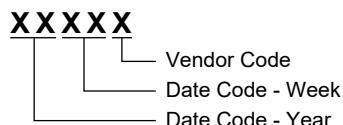

## MARKING INFORMATION

NOTE: XX = Date Code. XXXXX = Date Code and Vendor Code.

### SOT-23-8

### SOIC-8

Green (RoHS & HSF): SG Micro Corp defines "Green" to mean Pb-Free (RoHS compatible) and free of halogen substances. If you have additional comments or questions, please contact your SGMICRO representative directly.

## ABSOLUTE MAXIMUM RATINGS

Supply Voltage, $+V_S$ to $-V_S$ .....	6V
$V_{IN}$ Differential.....	$\pm(+V_S - (-V_S))$
Voltage at Input/Output Pins .....	( $-V_S$ ) - 0.3V to ( $+V_S$ ) + 0.3V
Junction Temperature.....	+150°C
Storage Temperature Range .....	-65°C to +150°C
Lead Temperature (Soldering, 10s) .....	+260°C
ESD Susceptibility	
HBM.....	4000V
MM.....	400V

## RECOMMENDED OPERATING CONDITIONS

Operating Temperature Range ..... -40°C to +85°C

## OVERSTRESS CAUTION

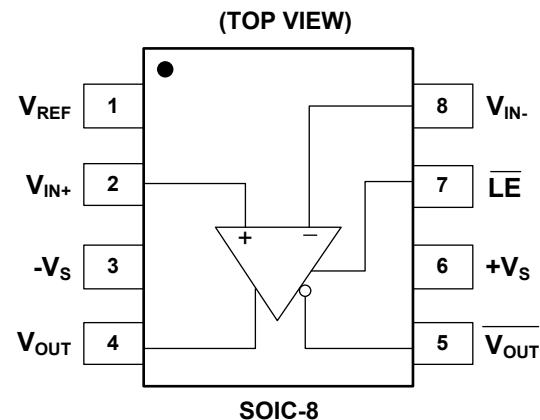

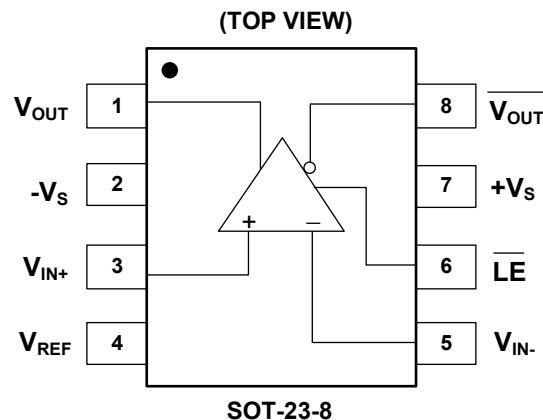

Stresses beyond those listed in Absolute Maximum Ratings may cause permanent damage to the device. Exposure to absolute maximum rating conditions for extended periods may affect reliability. Functional operation of the device at any conditions beyond those indicated in the Recommended Operating Conditions section is not implied.

## ESD SENSITIVITY CAUTION

This integrated circuit can be damaged by ESD if you don't pay attention to ESD protection. SGMICRO recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage. ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

## DISCLAIMER

SG Micro Corp reserves the right to make any change in circuit design, or specifications without prior notice.

**PIN CONFIGURATIONS**

## ELECTRICAL CHARACTERISTICS

(At  $T_A = +25^\circ\text{C}$ ,  $+V_S = 1.8\text{V}$ ,  $-V_S = 0\text{V}$ ,  $V_{\overline{\text{LE}}} = 1.8\text{V}$ ,  $V_{\text{CM}} = +V_S/2$ , unless otherwise noted.)
