## Dual 2.1W Audio Power Amplifier Plus Stereo Headphone & 3D Enhancement

---

### GENERAL DESCRIPTION

The SGM4888 is a dual bridge-connected audio power amplifier which operates from 2.8V to 5.5V supply voltage. It can deliver 2.5W into a 3Ω load or 2.1W into a 4Ω load from 5V supply at THD+N = 1%.

The SGM4888 integrates dual bridge speaker amplifier and stereo headphone amplifier on one chip to simplify design.

The SGM4888 has pop/click suppression circuitry, low power consumption shutdown mode and thermal shutdown protection.

The SGM4888 is available in a Green TQFN-4×4-24L package. It operates over an ambient temperature range of -40°C to +85°C.

**PIN CONFIGURATION**

**OVERSTRESS CAUTION**

Stresses beyond those listed in Absolute Maximum Ratings may cause permanent damage to the device. Exposure to absolute maximum rating conditions for extended periods may affect reliability. Functional operation of the device at any conditions beyond those indicated in the Recommended Operating Conditions section is not implied.

**ESD SENSITIVITY CAUTION**

This integrated circuit can be damaged if ESD protections are not considered carefully. SGMICRO recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage. ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because even small parametric changes could cause the device not to meet the published specifications.

## NOTES:

- The quiescent power supply current depends on the offset voltage when a practical load is connected to the amplifier.
- When driving 3Ω or 4Ω loads, the SGM4888 must be mounted to a circuit board that has a minimum of 2.5in<sup>2</sup> of exposed, uninterrupted copper area connected to the TQFN-4×4-24L package's exposed DAP.
