

GENERAL DESCRIPTION

The SGM31323 is a 3-channel, current-regulated RGB LED driver with an I²C-compatible interface. It is well suited for various applications powered by a 1-cell Li-Ion or Li-Polymer, or systems with 3.3V or 5V supply voltages, as well as 3-cell NiCd, NiMH or Alkaline batteries. No external components are required for the three constant current sinks.

With two programmable timers, users can adjust LED blinking time and get the result of fade-in and fade-out for unique color lighting.

Programmable I²C interface allows independent channel control for LED ON or OFF state and LED brightness due to 9 internal registers and an internal decoder. Each current sink can be independently configured with 192-step current levels from 0.125mA to 24mA. The SGM31323 provides less than 1µA shutdown current.

The SGM31323 is available in a Green UTDFN-1.5×1.5-8L package. It operates over an ambient temperature range of -40°C to +85°C.

FEATURES

- Input Voltage Range: 2.5V to 5.5V
- Ultra-Low 30mV Dropout Voltage at a 10mA Load per String
- Programmable LED Current through I²C Interface
- 0.125mA to 24mA Current Levels with 0.125mA Steps
- Independent Channel Control
 - ON/OFF State Interval Time Control
 - RGB LED Color Control
 - Programmable Ramp-Up and Ramp-Down Time
- No Noise and Constant LED Current
- Fast and Smooth Startup
- Less than 1µA Shutdown Current
- -40°C to +85°C Operating Temperature Range
- Available in a Green UTDFN-1.5×1.5-8L Package

APPLICATIONS

Multi-Color LEDs
 RGB Indicator LEDs
 Impact LED Signs and Displays
 Handheld Equipment

TYPICAL APPLICATION

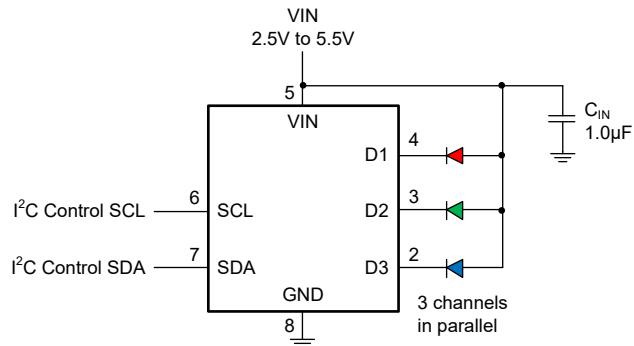

Figure 1. Typical Application Circuit

PACKAGE/ORDERING INFORMATION

MODEL	PACKAGE DESCRIPTION	SPECIFIED TEMPERATURE RANGE	ORDERING NUMBER	PACKAGE MARKING	PACKING OPTION
SGM31323	UTDFN-1.5×1.5-8L	-40°C to +85°C	SGM31323YUDW8G/TR	GJA XXX	Tape and Reel, 4000

MARKING INFORMATION

NOTE: XXX = Date Code.

GJA — Serial Number**X XX**

Date code - Week (01, 02, 03 ...)

Date code - Year ("A" = 2010, "B" = 2011 ...)

Green (RoHS & HSF): SG Micro Corp defines "Green" to mean Pb-Free (RoHS compatible) and free of halogen substances. If you have additional comments or questions, please contact your SGMICRO representative directly.

ABSOLUTE MAXIMUM RATINGS

VIN, D1, D2, D3 to GND	-0.3V to 6V
SCL, SDA to GND.....	-0.3V to V _{IN} + 0.3V
Package Thermal Resistance	
UTDFN-1.5×1.5-8L, θ _{JA}	99.5°C/W
Junction Temperature	+150°C
Storage Temperature Range	-65°C to +150°C
Lead Temperature (Soldering, 10s)	+260°C
ESD Susceptibility	
HBM	4000V
MM	400V
CDM	1000V

RECOMMENDED OPERATING CONDITIONS

Input Voltage Range.....	2.5V to 5.5V
Operating Temperature Range	-40°C to +85°C

OVERSTRESS CAUTION

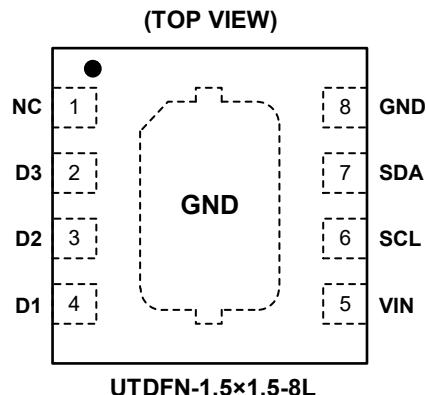

Stresses beyond those listed may cause permanent damage to the device. Functional operation of the device at these or any other conditions beyond those indicated in the operational section of the specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability.

ESD SENSITIVITY CAUTION

This integrated circuit can be damaged by ESD if you don't pay attention to ESD protection. SGMICRO recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage. ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

DISCLAIMER

SG Micro Corp reserves the right to make any change in circuit design, specification or other related things if necessary without notice at any time.

PIN CONFIGURATION**PIN DESCRIPTION**

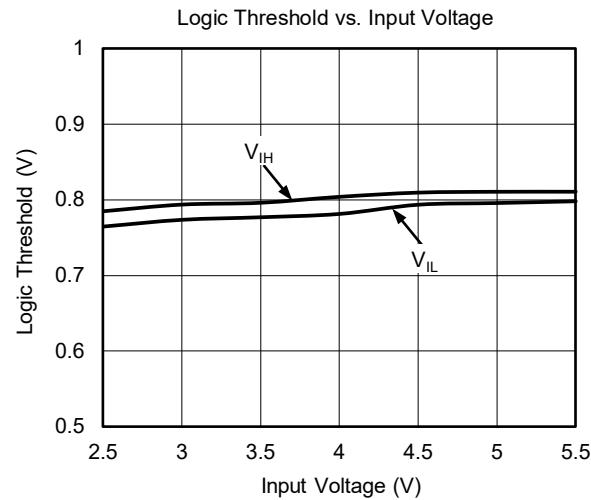

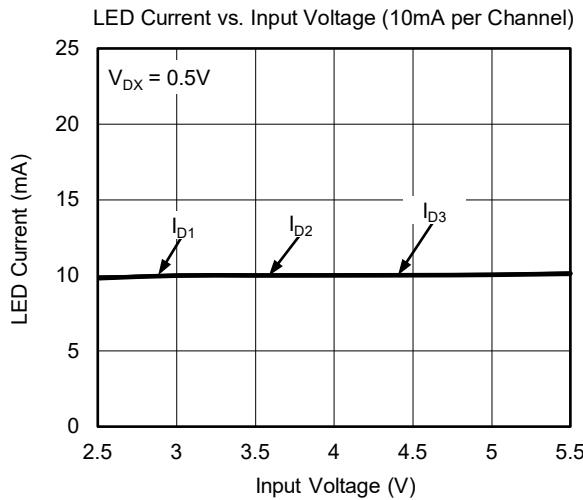

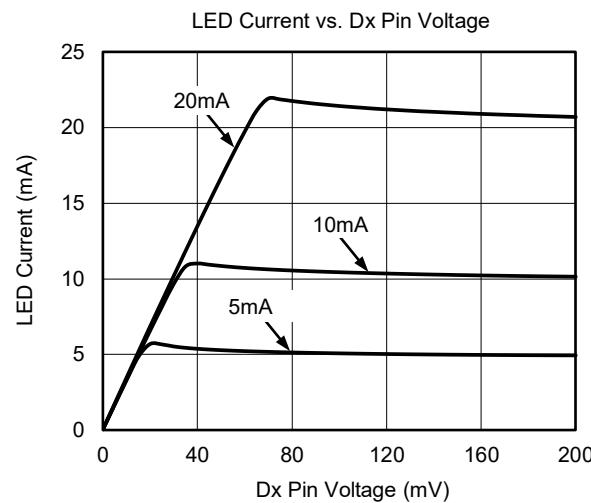

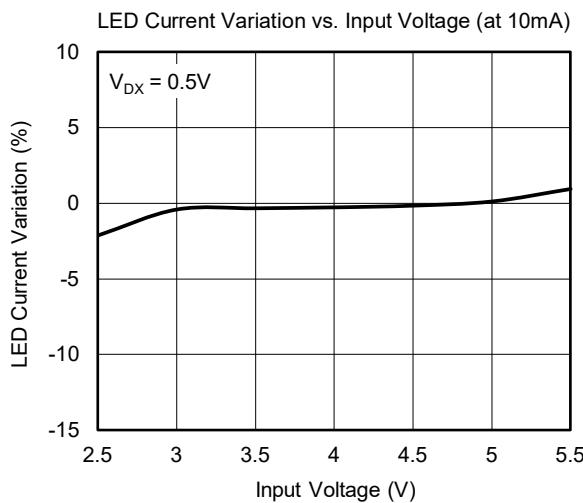

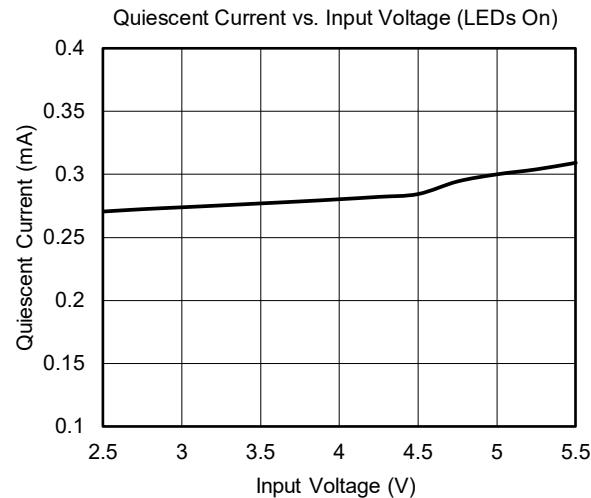

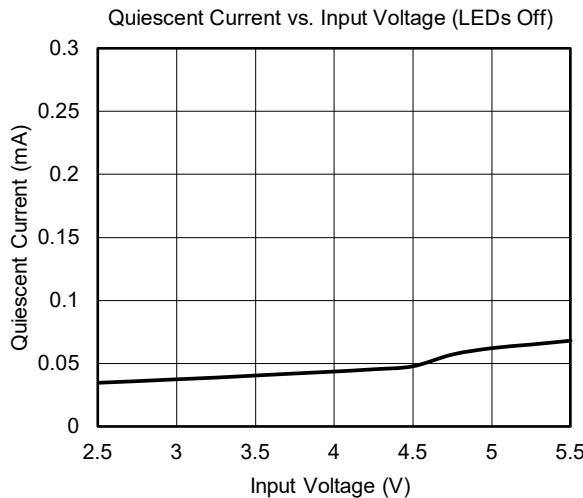

NAME	PIN	TYPE	FUNCTION
NC	1	—	No Connection.
D3	2	O	Current Sink 3. The LED current level and ON/OFF states can be set by I ² C interface.
D2	3	O	Current Sink 2. The LED current level and ON/OFF states can be set by I ² C interface.
D1	4	O	Current Sink 1. Current level and ON/OFF selections are controlled by serial interface.
VIN	5	P	Input Supply Pin.
SCL	6	I	I ² C Clock Signal.
SDA	7	I/O	I ² C Data Signal.
GND	8	G	Ground Pin.
GND	Exposed Pad	—	Exposed Pad. It should be soldered to the ground.

NOTE: I: input; O: output; I/O: input or output; G: ground; P: power for the circuit.

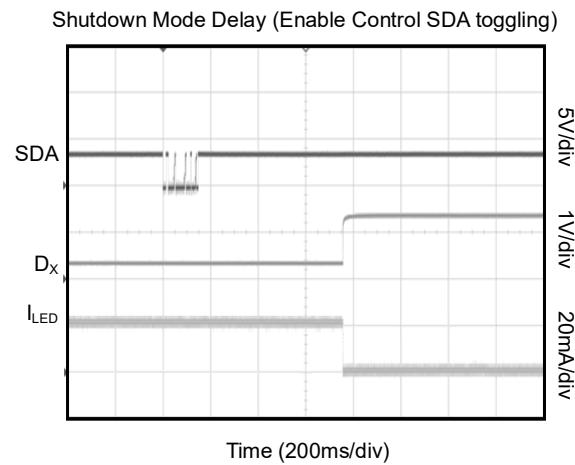

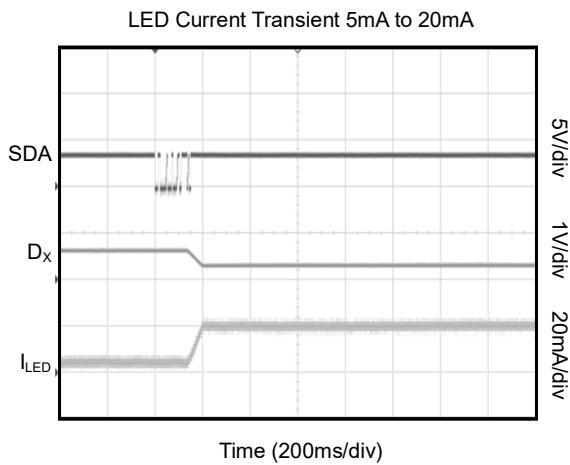

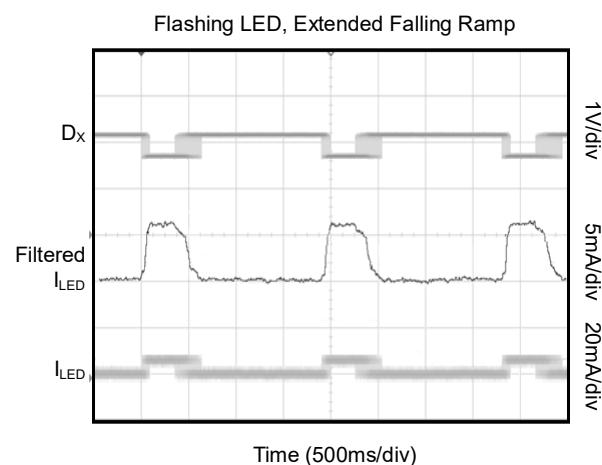

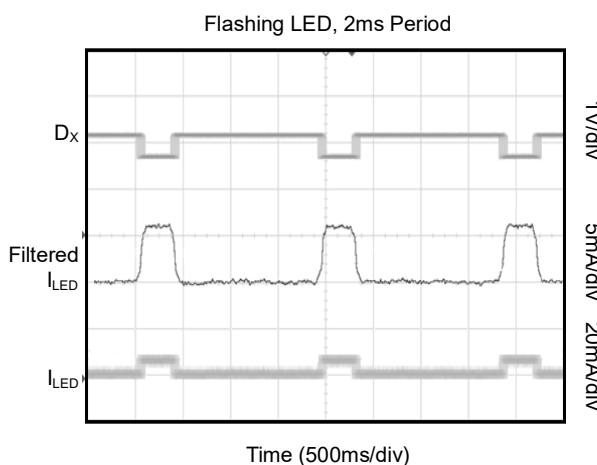

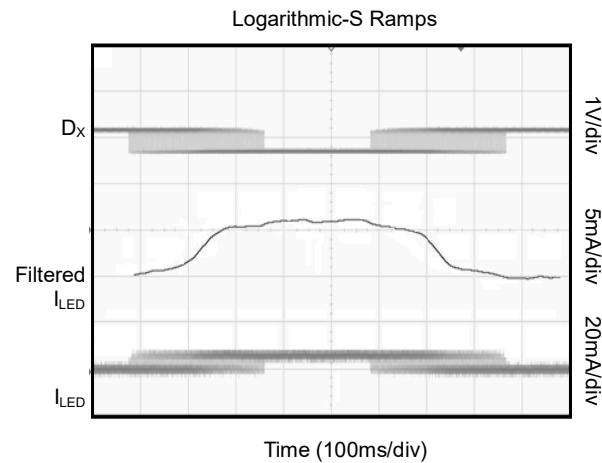

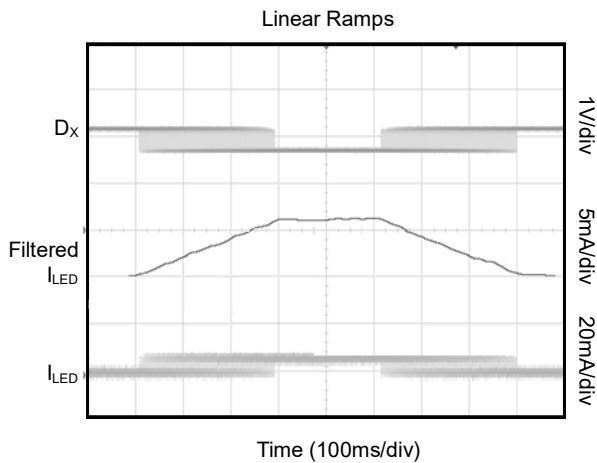

ELECTRICAL CHARACTERISTICS(V_{IN} = 3.6V, Full = -40°C to +85°C, typical values are at T_A = +25°C, unless otherwise noted.)

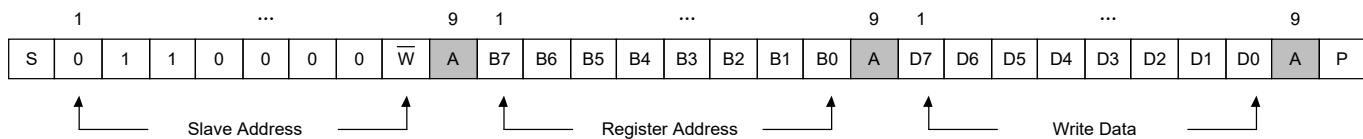

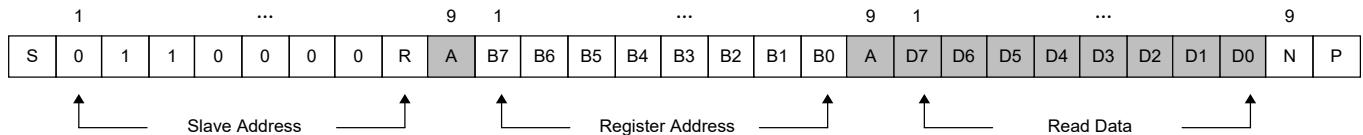

PARAMETER	SYMBOL	CONDITIONS	TEMP	MIN	TYP	MAX	UNITS
Power Supply							
Input Operating Range	V _{IN}		Full	2.5		5.5	V
Sink Pin (Dx) Dropout Voltage (90% of Nominal Current)	V _{D_MIN}	All channels set to 24mA, REG6-8 = BFh	+25°C		65	90	mV
Output Current Accuracy		All channels set to 10mA, REG6-8 = 4Fh	+25°C	-5		5	%
